PROFESSIONAL SUMMARY

Python Developer with hands-on experience building web applications and REST APIs using Django, Django REST Framework and Flask, backed by PostgreSQL and MySQL. Brings a strong SQL and data-analysis background from earlier roles and has deployed full-stack projects to production. Seeking an entry-level Python Developer role to write clean, maintainable backend code in a collaborative team.

TECHNICAL SKILLS

Languages	Python, SQL, JavaScript, HTML5, CSS3, JSON
Frameworks & Libraries	Django, Django REST Framework, Flask, Pandas, NumPy, Requests
Databases	PostgreSQL, MySQL, schema design, indexing, query optimization
Tools & Platforms	Git, GitHub, Postman, Render (deployment), VS Code
Concepts	RESTful API design, authentication, CRUD workflows, MVT architecture, debugging
Data & BI	Power BI, Microsoft Excel

PROFESSIONAL EXPERIENCE

Python Developer – Microdynamics Software Solutions Pvt Ltd, Pune April 2026 – Present

- Build and maintain full-stack web applications using Python, Django and Flask.
- Design and deploy secure REST APIs with Django REST Framework to connect front-end interfaces and third-party services.
- Design database schemas and write complex SQL queries in PostgreSQL and MySQL to manage application data.
- Debug issues using server logs and error-tracking tools to keep features stable.

Sales Executive, Analysis & Business Development – Infinity Retail Limited Jan 2025 – Apr 2026

- Analysed store-level sales, walk-in and ticket data across categories, supporting revenue tracking of about INR 4 Cr.
- Built employee performance dashboards and prepared Month-to-Date (MTD) sales reports for management review.
- Consolidated sales, operations and customer data into structured reports that improved sales efficiency and category growth.

Backend Support SQL Developer – Wapmebs Global Services Pvt Ltd, Pune Aug 2023 – Oct 2024

- Wrote SQL queries with multi-table joins, subqueries and aggregations for daily operational reports.
- Cleaned and validated data and maintained relational databases to ensure accuracy and integrity.
- Optimized slow queries and added basic indexing, improving data retrieval and report loading times.

KEY PROJECTS

Pics – Imitation Jewellery E-Commerce Application *| Django, DRF, PostgreSQL, JavaScript, Render*

- Deployed a full-stack e-commerce app to production on Render with product catalogue, user cart and shop pages.
- Built DRF endpoints returning JSON for product filtering, categories and inventory updates.

LWT (Learn With Tech) – Community Learning Platform *| Django, DRF, PostgreSQL, HTML/CSS, JavaScript*

- Built a platform for users to learn, teach and share resources, with secure upload of video tutorials and downloadable study material.
- Added a career guidance module to help students plan their learning roadmaps.

VBI – Virtual Bank of India (Demo) *| Django, PostgreSQL, HTML/CSS, JavaScript*

- Developed a banking app with authentication, balance tracking, deposits and fund transfers; secured configuration with .env files.
- Designed the PostgreSQL schema and queries to track transactions and keep balances accurate.

EDUCATION

Bachelor of Computer Applications (BCA) – Bharati Vidyapeeth Deemed to be University, Pune (Sangli) 2020 – 2023

CGPA: 8.54 / 10
